

# 2020 Creek Station Sauvignon Blanc

CCE

## Creek Station

One of the original station runs in South Australia, the Creek Station has abundant springs, excellent grazing and proximity to river and sea commerce, enabling the station to flourish.

### TASTING NOTES

This environment produces a wine that exhibits lively citrus notes on a background of tropical fruit, finishing with a zesty crisp finish.

### VINTAGE

A return to average winter rains in 2019, together with cool spring conditions, led to strong early spring growth and bunch numbers across all varieties. The early summer remained cool, with above average shower activity which had some impact on fruit set and resulting yield.

Although the weather in the lead up to harvest was somewhat more unstable than average, some exceptional fruit characteristics were found in white varieties given time to balance, in particular, sauvignon blanc, pinot gris and chardonnay.

2020 district yields remained variable between varieties and blocks, but in general were less than in previous averages.

**ALCOHOL** 12.5%  
**REGION** South Australia
